GIRONA, THE HOME OF CYCLING

Girona is our home, where we live, where we are from and where Tactic was born. We know it like the back of our hands and it is the Girona roads which inspire our designs. More than a city, Girona is a feeling, a community, a cycling mecca with over 100 professionals living in it and ten times the amount of cycling visitors.

Being in Girona allows us access to a vast community of athletes, both local and from all over the world, who can test our product and represent our brand. Girona is the beating heart of cycling and our fingers are right on the pulse.

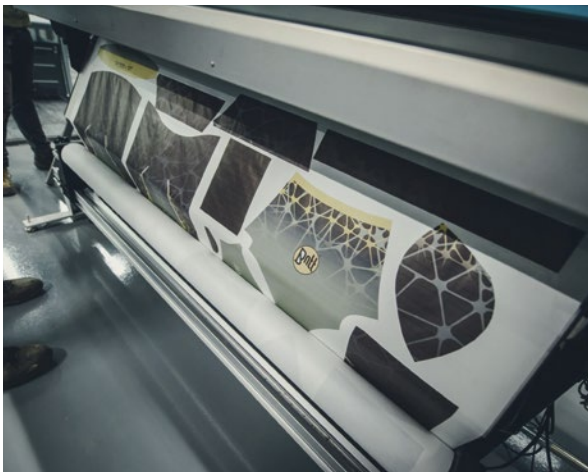

OUR PROCESS

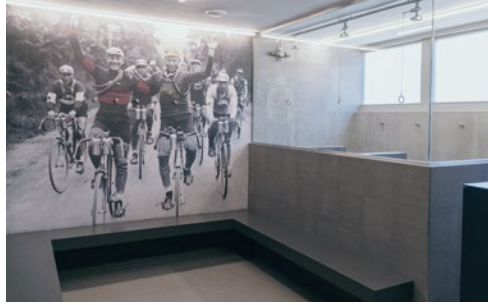

Everything we make at Tactic is KMO, produced in-house at our HQ in Girona with care and attention to detail.

The process begins with our customer service team who communicate with clients and the design team to create exactly the right design. Next, comes the simultaneous printing of the design onto transfer paper and the pattern-cutting.

Once this is ready we use heat transfers to print the design onto the material, which is then sorted and sent to a local needleworkers to be sewn together. Once the clothing is returned to us it goes through rigorous quality-control before finally being packaged in 100% biodegradable bags and sent out to the customer.

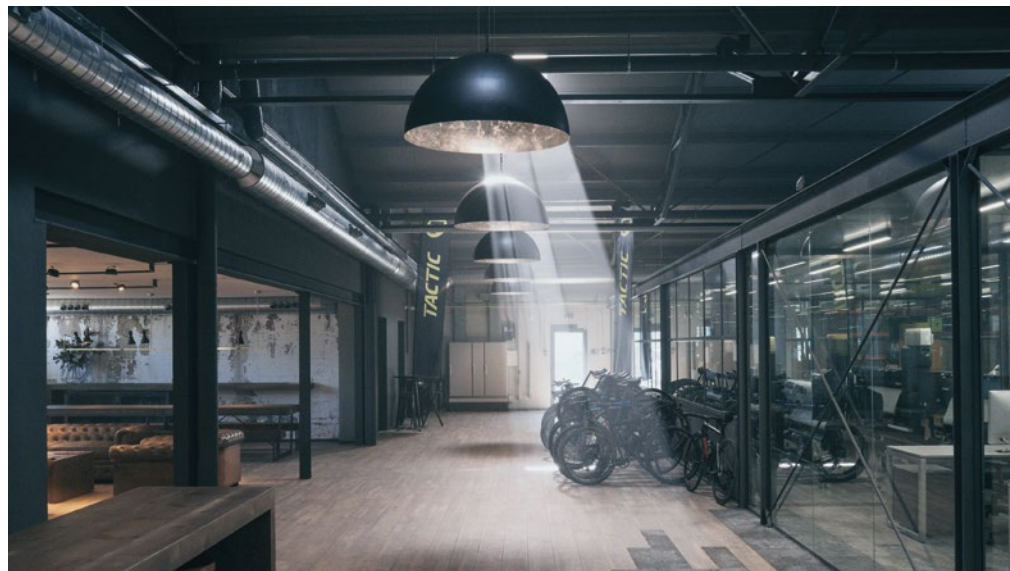

RESTLESS SPIRIT. CAN'T STOP, WON'T STOP.

It's not in our nature to stand still and admire the view behind us. We are never content with status quo, we understand the importance of constant evaluation and improvement and we are always moving forward.

That's why we decided, in 2015, to overhaul our warehouse to create a space that reflected our brand and our values and it's why we are constantly road-testing new materials and styles, constantly striving to improve our products so that you get the very best cycling clothing - made by cyclists, for cyclists.

HARD DAY JERSEY / BIB SHORTS

A. 'Slim fit' pattern with compressive lycra sleeves for a tighter fit in the arms and a mesh underarm for extra ventilation.

B. Non-slip 'SIGMAGRIP' technology on the ends of the sleeves and shorts made from seamlessly cut silicone integrated into the fabric. An authentic 'second skin' feeling.

C. Seamless lycra straps which lie completely flat providing extra comfort for the back and shoulders.

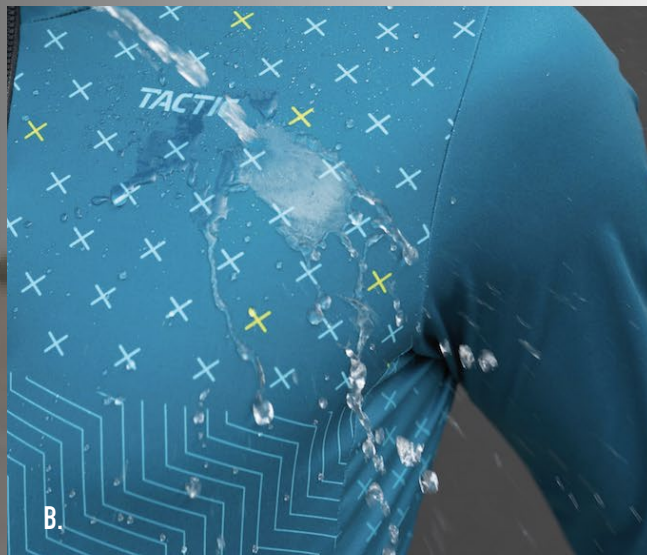

SPEED SUIT

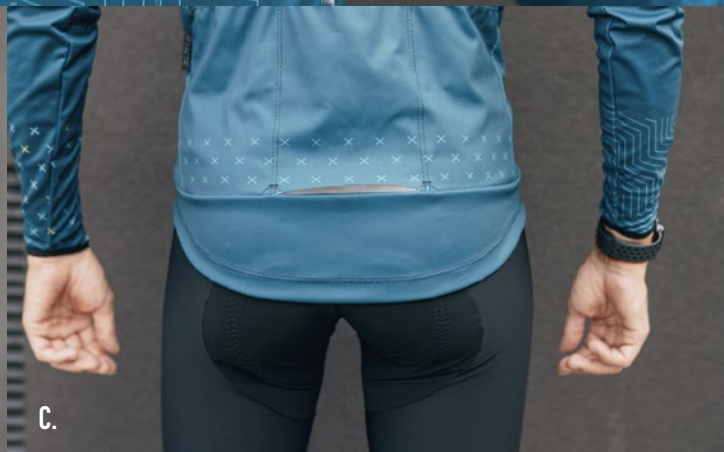

A. Open skinsuit. A combination of the Hard Day jersey and bib shorts all in one piece.

B. Super elastic main fabric which adapts to the body to increase aerodynamics whilst simultaneously light and breathable for extra comfort.

C. 'SLIM FIT' pattern with a snug fit for the most demanding cyclists.

A.

C.

HARD DAY SHIELD JACKET

A. A very light, thin and elastic jacket. High neck for protection from the cold.

B. Fabric with a DWR water and wind-resistant membrane. Provides high protection from the cold without compromising on breathability.

C. Longer at the back for protection against splashes.

LONG DISTANCE SUIT

A. Skinsuit specially designed for long distances with lycra sleeves for improved aerodynamics which simultaneously provide protection from the sun.

B. Highly elastic fabric which also provides ventilation in the torso area. Keeps the body cool by assisting the evaporation of sweat, fabric that feels very light, giving a lot of freedom for movement. Non-slip 'SIGMAGRIP' technology on the ends of the legs made from seamlessly cut silicone integrated into the fabric itself. An authentic 'second skin' feeling. The fit is perfect, especially for the bike and run sections.

A full-page photograph of two male trail runners in a mountainous landscape. The runner on the left is captured mid-air in a jumping pose, while the runner on the right is in a full running stride. Both are wearing red long-sleeved athletic shirts with black accents and black shorts. The background features a hazy, mountainous terrain under a cloudy sky. The word "RUNNING" is superimposed in large white letters across the center of the image.

CAMISETA ULTRALIGHT MAN 720 WOMAN 715

A. The ultralight fabric and mesh inserts will always keep you cool thanks to its optimal ventilation and fast-drying properties.

B. An ergonomic pattern that maximises comfort and allows total freedom of movement.

ULTRATRAIL

A. The 'AERO' fit pattern provides high compression. A 'second-skin' effect which adheres to each muscle to delay the onset of fatigue and thus promote performance. Ideal for extreme efforts.

B. Non-slip silicone inserts on the shoulders and sides to keep a backpack in place eliminating annoying movement and bumps, turning the shirt and backpack into one.

C. Tight, elastic pockets for small items such as gels or energy bars.
